

Wool, Highest Market Price.

W. R. GOTT & CO

BOLTACRAT 47417.

He will make the season of 1910 at our stable on Herring avenue at

\$15. to insure a living Colt

BOLTACRAT record 224, is a black stallion by Bernada, 5674, dam Carrie Mack, by Camp Ferguson, 494; granddam Lady Thorne, Jr., by Mambrino, etc.

Bernada's sire is by Banker, 4114, dam Pattle Patchen.

Boltacrat's colts have records better than 230. His get Crapshoot 211, H: 71-3 2:17; Lee Mack 2221, Ruby Lee 2231, J. D. 2:57; Joe Taylor 2241 and Grayhound 2294. Bernada's colts all have records under 2:30; as is also the case of Carrie Mack, Boltacrat's dam, thus proving that he is from a strain of winning stock, himself being a winner.

We will also stand at same time and place

Daws' Hughes.

At \$8.00 to insure a living Colt.

Black Jack 15 hands high, who has shown some of the best colts in Garrard County.

Money, positively due if mare is parted with, sold or bred to another animal unless otherwise agreed to. We are not responsible for accidents, should any occur.

J. I. & H. C. HAMILTON

W. L. DOUGLAS \$3.00, \$3.50, \$4.00 & \$5.00 SHOES

Best in the World UNION MADE Boys' Shoes \$2.00 and \$2.50

W. L. Douglas shoes are the lowest price, quality considered, in the world. Their excellent style, easy fitting and long wearing qualities excel those of other makes. If you have been paying high prices for your shoes, the next time you need a pair give W. L. Douglas shoes a trial. You can save money on your footwear and get shoes that are just as good in every way as those that have been costing you higher prices.

If you could visit our large factories at Brockton, Mass., and see for yourself how carefully W. L. Douglas shoes are made, you would then understand why they hold their shape, fit better and wear longer than other makes.

CAUTION - W. L. Douglas name and price is stamped on the bottom to protect the wearer against cheap imitations. If W. L. Douglas shoes are not for sale in your vicinity, write for Mail Order Catalog, W. L. Douglas, Brockton, Mass.

ASK TICKET AGENT FOR PARTICULARS

Tuberculosis.
We are glad to give our readers abstracts of the interesting addresses on Tuberculosis of Doctors J. R. Kincaid and J. A. Amon delivered at the special union services held at the Baptist church in this city on the evening of April 24. The entire addresses would be published had we the space. Dr. Kincaid said in part:

We imagine we have in Kentucky the finest climate, the best water, purest air of any State in the Union. We boast of our celebrated Blue Grass region as though we were located on the threshold of Paradise. But permit me to correct the error. Among other things Kentucky is famed for its illiteracy and high death rate from tuberculosis. During the year 1907 there were 6,438 deaths from tuberculosis reported to the State Board of Health for the State of Kentucky. What a tremendous financial loss. If each life be valued at \$1,700, the actual and real loss to the State that cannot be replaced amounts to \$10,964,000.

This does not include the thousands of dollars paid out for doctors' nurses and for medicines, and the necessary loss of time of others in caring for those sick of the disease.

Should a case of small pox be reported as existing in this community, there would be a stampede. Excitement would prevail to an alarming extent and the officers of the law and health would be appealed to and urged to remove the case out of this locality and place it under quarantine, yet the mortality from small pox is nothing to be compared with tuberculosis. The average number of deaths per county in Kentucky is fifty-four. I am sure that there are at least seventy-five in this county.

How are we to prevent the spread of tuberculosis and save this leakage of untold millions? The people must learn that tuberculosis is not hereditary and that it is a preventable disease. They must be taught that consumption is a germ disease and can be prevented as surely as diphtheria, typhoid fever and scarlet fever. Teachers can impress it upon children in school and in turn, parents can be taught by children that the Great White Plague can be subdued only by exercising care and taking proper precautions against the spread of the bacilli, which are the consumptives. It is criminal negligence and wilful murder for a tubercular patient to expectorate upon floors or public highways. The bacilli become dried up, and still alive, are scattered by every breeze that carries the disease laden dust. These germs gain access to the system either through the lungs by dust or by swallowing milk and other fluids or by meats that are infected. Patients should take every precaution against spreading the disease. Suitable paper boxes are made and are to be had at any drug store that patients may carry, in which the sputa may be deposited until a suitable place can be found to burn it.

We do not inherit tuberculosis but we do inherit a predisposition. This should be a warning to avoid everything that would tend to lay a foundation for the disease.

We should keep up our vitality. This can be done by right living and avoidance of everything that would lower our natural resistance. Physicians recognize the fact that dissipation destroys this natural resistance to disease, and when a drinking man contracts any serious illness the chances against his recovery are decidedly unfavorable. Fresh air in abundance, sunlight, and nourishing food, good rest, (mental and physical) should, when properly applied, in incipient cases of consumption result in the cure of the majority of cases.

Let us all work together in an intelligent manner to teach the coming generation that man should live out his allotted time. Let us burn into the minds the principle that a pure and upright life is a material aid in protracting our lives, and that 'sowing wild oats' is sowing the seeds of death, that to be good and useful citizens we must be clean in body and mind.

Dr. Amon said in part:

Tuberculosis is a communicable, preventable and curable disease. Robert Koch, of Berlin, in 1881, discovered the bacillus, which he demonstrated to be the specific cause of tuberculosis. This germ multiplies so rapidly and so invisibly in the body of the affected person, that the consumptive in coughing emits several million in 24 hours. In air and sunshine it loses its vitality in a short time, whereas in cold, dark and damp places it will live for months, even years. The weight of medical opinion is that this disease is transmissible from cattle to human beings. The germ varies in virulence at different times and in different animals, that of that cow being especially virulent. This germ enters the body either with the air we breathe, or with tuberculous food-stuffs, but rarely through wounds. The consumptive spits upon the floor or other objects—the spittle dries into a dust, rises into the air and is breathed by all who come in contact with it. The most common lodgment is in the glands of the neck and arterioles of the lungs. Wherever it implants itself an inflammation may occur around it, with the result that a tubercle is formed. At this point the development may become arrested and possibly remain latent for years, or again it may soften and its contents be discharged. When this condition occurs in the lungs it is called consumption, in the glandular structures, scrofula, in the bony structures, it is what is familiarly known as white swelling.

Between birth and old age, it

causes one out of every seventh death in adult life, one out of every third or fourth death. In infancy and in old age, tuberculosis claims its fewest victims, while from early manhood and womanhood, it claims, by far, its greatest number.

You will likely wonder how, with all these teeming millions of bacilli about us, any one ever escapes the disease. The fact is very few of us die without some trace of its activities. It is estimated that 98 per cent of all who die of various diseases, show traces of tuberculosis. Every one must therefore be prepared to battle with this enemy. Two conditions are essential to the development of this disease. 1st, the presence of the germ; 2nd a predisposition of the body, due to various unhealthful factors; such as vicious heredity, alcohol, poverty, sudden changes of temperature, overwork, worry, bad ventilation and recent acute disease.

Since the Indian has changed from the wigwag to the box house and heating stove, he is rapidly dying of consumption. In no other way are the harmful effects of alcohol more forcibly shown than in the predisposition it causes to consumption. It may be noted that the Jew, who is least subject to this disease is the most temperate, and that the negro and Indian who are very susceptible are also very intemperate.

It is a common thing to see a drunken parent rear a family of tubercular children. We are therefore handicapped by the bad living of our ancestors.

The conditions which tend to this disease are low altitudes, dampness, density of population, crowded rooms, rooms from which sunlight and air are excluded.

Why do we meet with tuberculosis as frequently as we do, in people who live in the country, and who spend a large part of their time in open air and sunlight. It is probably in a large measure due to ill-ventilated sleeping rooms. Bedrooms should be so open that the temperature would be as low inside as it is outside. No room should have less than two windows and they should be opened at night, one up from the bottom the other down from the top.

In whom may we look for this disease? What is the appearance of the child predisposed to the disease?

He has pallid skin, flabby flesh, his nose is large and broad, there is a discharge from the nose, enlarged turbinates and bones obstructing breathing through the nose. He has adenoids, hypertrophied tonsils. He is a mouth breather and starved for oxygen. He has an unhealthy throat, persistent bronchitis, enlargement of glands of neck and throat, is poorly nourished, narrow, shallow chest, projecting shoulder blades, sloping shoulders, small respiratory muscles, shallow breathing, defective development of the heart and weak irregular pulse.

In the adult what do we find? That the height is out of proportion to the weight, the neck is long and thin, shoulders are stooped and sloping. There is lack of muscular vigor, the chest is narrow and does not expand freely. There is pallor of complexion, frequently a pearly complexion and a transparent skin showing the veins. There may be glandular enlargement. Those who are beginning to develop this disease usually show, first of all, a morning cough, a disinclination to exercise, a loss of weight, a quickening of the pulse, shortness of breath, a flush of the cheek, and a slight afternoon rise of temperature. All of these symptoms may not be present in any given case, but the presence of a number of them should always arouse a suspicion.

Nature's cure is a generous diet, sunshine by day, and fresh air by night. To win the fight, we must begin before the battle is already won by the enemy.

D. W. Hart, Pisgah, Ky., Breeder of B. P. Rocks, says, "I used Bourbon Poultry Cure with my fowls and find it to be a splendid conditioner and tonic. I have also cured cholera with it." Sold by J. R. Mount and Son.

Young Girls
Just entering into womanhood, often suffer much pain and misery during the change of their physical organization. Many women will tell you their female trouble started during that trying period, and has clung to them ever since. Cardui is a friend to young girls, as well as to women of all ages. It has been found to help women during their trying periods by relieving pain and restoring disordered organs to health.

Take CARDUI
Mrs. Mary Hudson, Eastman, Miss., writes: "While staying with me and going to school, my young sister was in terrible misery. I got her to take a few doses of CARDUI and it helped her at once. 'I have taken Cardui myself and believe I would have been under the clay had it not been for that wonderful medicine.' Try Cardui. It will help you. For sale everywhere."

AND THE DOG CAME BACK

Pittsburg Man's Act of Duplicity "Got Him Nothing," as the Slang Phrase Says.

Out in the Schenley Farms district is a large, irate man, who is on the lookout for a small, freckled boy with a funny little green cap. And who betide that boy if he is caught, which he probably will not be. The man has a dog, or what passes for one in the eyes of his wife. It is one of those wispy and bedraggled-looking kyoodles with a peevish disposition and a mop of hair hanging in its eyes. It is the gift of his wife's mother and, to his wife, is all that a dog could or should be.

It was when the gentleman in question came one morning upon a small freckle-faced youngster with a funny little green cap, playing with the dog, that an inspiration came to him.

"Say, boy," he ventured, "would you like to own that dog?"

"Wot, me?" replied the boy. "I wouldn't take him for a gift."

"But," said the man, "he seems to like you, and I'll tell you what I'll do. I'll give you a quarter if you sneak away with him and lose him somewhere. But be careful that my wife doesn't see you or she'll skin you alive."

"I'm on," said the kid, and clutching the coin and the dog he darted away, while the man proceeded to his office with a light heart.

Evening came and the man returned to his home. At the threshold he was greeted by a shrill yelp, and there stood his pet aversion with a brand new ribbon at its throat.

"O, James," cooed his wife. "What do you think? Poor little Fluffy was lost all day. I was worried nearly sick. And then a little boy brought him back. The dearest little chap, with a freckled face and a funny little green cap. He found him away downtown, and I gave him a dollar for his trouble."—Pittsburg Gazette-Times.

TAKING NO CHANCES.

Guide—We are now about to enter the gallery of the senate.

Silas Harker—Wait a minute, mister, till I hide my watch and money.

Timely Interruption. Mrs. Benham had just seated herself to work at a bit of embroidery that required particular care and attention, when there came a ring at the telephone. "I just know that's Mrs. Gummy," she said, as she laid down her work and went to answer the call. "Whenever I am unusually busy and haven't any time to spare she rings me up and talks to me by the hour."

She was right. It was Mrs. Gummy, who was fully as talkative as ever. She began with a long story and when fairly in the middle of it the clock on the wall of the room began to strike. "Wait a moment," interposed Mrs. Benham. "I can't hear you until this noise stops."

"What made that noise?" asked Mrs. Gummy, after it had ceased. "It was only the clock," answered the patient Mrs. Benham. "You know it always strikes once or twice when we get to talking."

The conversation did not last long after that.—Youth's Companion.

Made It Clear. Jim had never learned to read by the ordinary methods the face of the old eight-day clock. It pleased his long-time employer, however, to ask him the hour and hear his answers. "Jim, what time does the old clock say?" he asked one evening, when he had callers. "Step out in the hall and see."

Jim was gone several minutes, but returned with a beaming face. "Ah—ah—waited 'jest' a minute to see which'd get ahead, de shot' one or de long one," he said. "Wen I went out dey was bobe on de left 'an' wind-in' place, sah. But de long one, she clip it up good an' libely 'wen she see me watching out, an' now she's 'bout a inch ahead, sah."—Youth's Companion.

Wonderful! "You can talk all you want of finding a clam in the chowder," said the table d'hôte fend, "and real beans in the soup and coffee beans in the coffee, but what do you think has happened to me?"

"Give it up."

"I've found a mushroom in the sauce on this spaghetti!"

Commissioner's Sale of Land. Garrard Circuit Court.

Ann M. Broadus' Heirs, Plaintiffs, Vs. Ann M. Broadus' Heirs, Defendants.

In obedience to a judgment of the Garrard Circuit Court rendered at its April Special term, April 5, 1910, in the above-styled case, I, as Master Commissioner of said court in said case, will, on Monday, May 23d, 1910, between ten o'clock a. m. and two o'clock p. m., be in the regular County Court day of Garrard county for said month, sell to the highest bidder, at the courthouse door in Lancaster, Garrard county, Kentucky, the following property situated in Garrard county, Kentucky, on Broadus Branch or Lick creek and bounded as follows:

Beginning at a point in middle of Nicholson's Branch in line to E. F. Gay and corner to J. B. Carter's heirs, thence leaving branch and with Car-

ter heirs N 54° W 7.25 chains; S 38° W 3.83 chains; N 68° W 18.82 chains to a point 9 feet N. of a locust stump and sprout, corner to same; thence with line of 40 acre tract sold by A. H. M. Broadus to J. B. Carter N 4° E 28.05 chains to a point in middle of Lick Creek, corner to same; thence down Lick Creek S 24° E 1.66 chains to an elm stump on South bank; S 81° E 5.25 chains to a stone on South bank; S 78° E 5.70 chains to a sycamore stump on North bank; N 41° E 5.60 chains; N 69° E 6.45 chains; S 72° E 7.00 chains to a point on North bank and midway between a sycamore and honey locust, standing about 15 feet apart, corner to Carter heirs and Nathaniel Prewitt; thence with Prewitt, still down creek, Lick Creek and opposite the mouth of a drain, corner to Prewitt; S 50° E 5.72 chains to a point in middle of creek and at mouth of Nicholson's Branch; thence up said branch S 28° W 7.00 chains; S 11° W 12.00 chains to a point on East side; S 10° W 6.75 chains to a point 8 feet West of stone fence; S 49° W 8.00 chains to the beginning containing 153.03 acres.

This sale is made for the purpose of dividing the proceeds amongst the owners of said land according to their respective rights and interests.

TERMS. Said land will be sold in one body by terms. Said sale will be made on a credit of six and twelve months, one half of the purchase money being due in six months from day of sale and the other half being due in twelve months from day of sale. The purchaser will be required to execute bonds, with good security, to the Master Commissioner for the purchase money, bearing six per cent interest per annum from date of sale till paid, upon which execution may issue if not paid at maturity, the same having force and effect of a judgment. A lien will also be retained upon the land sold for the payment of the purchase money and interest aforesaid.

W. I. WILLIAMS, Master Commissioner Garrard Circuit Court.

Commissioner's Sale of Land. Garrard Circuit Court.

Lucy Ann Simpson's Executor Pff. Vs. Addie Sparks, Etc., Defendants.

In obedience to a judgment of the Garrard Circuit Court rendered at its April Special term, April 5, 1910, in the above-styled case, I, as Master Commissioner of said court in said case, will, on

MONDAY, MAY 23, 1910, between ten o'clock a. m. and two o'clock p. m. be in the regular County Court day of said county for said month, sell to the highest bidder at the courthouse door, in Lancaster, Garrard county, Kentucky, the hereinafter described real estate or so much thereof as may be necessary. Said real estate lies in Garrard county, Kentucky, on the Buckeye turnpike and is bounded as follows:

Tract A. Beginning at three notches now cut in fence in a drain and 10 feet west of a dead double buckeye, in line to Davis Suttons and a new corner to the part cut out to Betsy Warren, thence near line to said Warren up said drain and across a ridge N 37° E 12.07 chains to a stake in the middle of another drain or hollow 14 links N 64° W from a marked mulberry post standing on E. B. bank of hollow, thence down hollow N 29° W 3.05 chains to a stake on West bank, and about 15 feet west of the mouth of a small drain entering from the west; N 22° E 7.16 chains to a marked locust on south bank of a branch, in line to Mrs. Hill, and a new corner to said Betsy Warren; thence down branch with Hill N 17° W 2.87 chains; N 35° W 2.77 chains; N 14° W 3.22 chains; N 60° W 5.00 chains; N 72° W 3.00 chains; N 71° W 1.50 chains to a stake on south bank of branch and at mouth of a drain entering from the South corner to Hill and Davis Sutton; thence with Sutton, up drain; S 17° W 7.83 chains to a hickory in drain; S 11° W 11.54 chains to the south draw bar post of a pair of draw bars on a ridge, corner to said Sutton; thence with a wire fence N 68° W 6.90 chains to a stake and fence post in line to S. S. Long and corner to said Sutton, with Long S 7° W 16.78 chains to a stake on a south hillside, corner to same and in line to said Sutton, thence with Sutton S 87° E 16.50 chains to the beginning and containing 51.79 acres.

Tract B.—Bounded as follows, to wit:

Beginning at a stake in hollow and corner to Hill and Davis Sutton's hollow, thence with Lucy Ann Simpson's aforesaid 60 acres 3 rods and 14 poles tract S 22° W 30 poles to a post at end of draw bars, thence S 81° W 21.6 poles to a stake at east post of draw bars, thence S 69° E 34.7 poles to a stake, thence N 10° W 28 poles to a hickory in a drain, thence down same N 17° E 52 poles to a stake at mouth of drain in a line of Hill in a branch, thence with middle and meanders of same, with Hill S 69° E 34.7 poles; S 78° E 10 poles; S 45° E 14 poles; S 50° E 4 poles; S 16° E 22 poles; S 43° E 7.194 poles to the beginning, containing 23 acres, 2 rods and 21 poles.

Tract No. B is a part of tract No. A and is included in the above boundary of tract No. A. Tract No. B is called "Second Tract" in the judgment of sale. Tract No. B, or so much thereof as may be necessary to raise the indebtedness hereinafter set forth will be sold first and in the event it fails to bring the necessary amount then enough will be sold from what is left of tract No. A and adjoining tract No. B to make up the sum required to be raised. Reservation is made of passway over Tract No. B as said passway now exists. Said sale is made for the purpose of paying indebtedness owing to Addie L. Sparks and for costs and allowances.

The total amount to be raised amounting to \$1,728.87.

TERMS. Said sale will be made on a credit of six and twelve months, one half of the purchase money being due in six months from day of sale and the other half being due in twelve months from day of sale, and the purchaser will be required to execute bonds, with good security, to the Master Commissioner for the purchase money, bearing six per cent per annum from date of sale till paid, upon which bonds execution may issue if not paid at maturity, said bonds having force and effect of a judgment. A lien will be retained upon the land for the payment of the purchase money with interest aforesaid.

CORTRIGHT METAL SHINGLES

ARE FIRE PROOF

THEY will not burn. Will not split or curl like wood shingles. Will not crack and roll off like slate. Will not rip at the seams like plain tin. Neither will they rattle during high wind storms. They never need repairs and last as long as the building. And last of all, they make the handsomest roof and are not expensive.

Apply to local Contractors or Cortright Metal Roofing Company. Philadelphia, Pa.

IT'S QUALITY THAT COUNTS

When buying that fence for your farm don't be misled into getting a poor fence because it costs a little less per rod. You'll be sick of your bargain by the end of the first season. You'll wish you had considered quality instead of price.

PEERLESS WOVEN FENCE

is built to stand many seasons of hard usage. Made of hard steel galvanized wire that will not rust out and give up stability to the fence. The fence is set on all four sides, and gives upright stability to the fence. The fence is set on all four sides, and gives upright stability to the fence. The fence is set on all four sides, and gives upright stability to the fence.
